

# Memo

**To:** All Residents and Partners of Moorings Park Institute

**From:** Ross Dickmann, Vice President of Operations

**Cc:** File

**Date:** March 13, 2020

**Subject:** Coronavirus Update #12

---

Statistical data from Florida Department of Health regarding COVID-19 remains largely unchanged although the number of confirmed cases has now risen to 45 statewide.

Senior management and the Resident Council engaged in a very productive meeting today. We discussed all precautionary actions taken to date by Moorings Park Institute. Additionally, we reviewed future plans and concept of operations in the event further measures are determined necessary. A number of resourceful and valid ideas surfaced from today's meeting. Some of them are already in place, while others remain under consideration. Those recommendations adopted and implemented include:

- Posting only the most current summary report (update). Past updates will continue to be made available on the emergency link by clicking on a specific **hyperlink**. Residents can also find a helpful handout on preventative measures under this section.
- Limiting the posting of updates on the emergency link to pertinent information only that directly affects or is likely to affect our residents and partners.
- Resident Council agreed to take a leadership role in helping to conduct screenings for activity events, and limited access locations. These screenings simply involve questioning individuals or small groups of people to rule out virus symptoms, international travel and all cruises.

By now, most of our residents are aware of cancelled events and activities. Should you have further questions related to this subject, please contact your Campus Life department. As stated above, updates will only be sent out if new information is learned that directly effects our partners and residents. You should not anticipate weekend updates unless critical information is made available. Thank you and be well.
