

Memo

To: All Residents and Partners of Moorings Park Institute

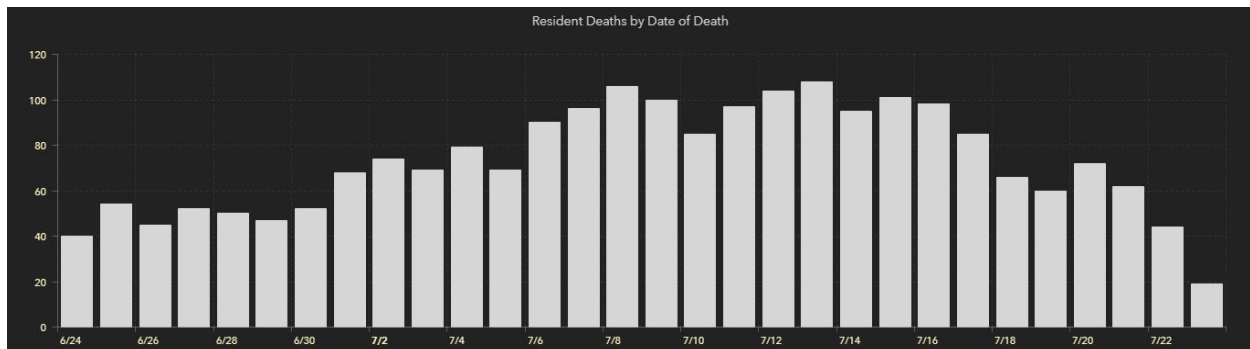

From: Ross Dickmann, Vice President of Operations

Cc: File

Date: July 24, 2020

Subject: Coronavirus Update #50

The number of confirmed statewide COVID-19 cases over the last seven days averages 10,700 per day. Florida's positivity rate has risen to 12.3% since update #49, while Collier County has remained static. Despite the rise in number of confirmed cases, the State of Florida continues to see a positive downward trend in deaths as evidenced by the below chart on behalf of the Florida Department of Health.

We learned this morning of a positive COVID-19 test involving an Orchid Terrace partner. The partner is self-isolating at home and following the direction of their primary care physician. Contact tracing is being performed to assist in determining past person-to-person contact. Additionally, formal notification to affected resident family members, guardians and staff is currently underway.
